

Original data for zinc in zambia\_wom  
women ; age 18-67

**Original data for zinc in zambia\_wom  
women ; age 18-67**

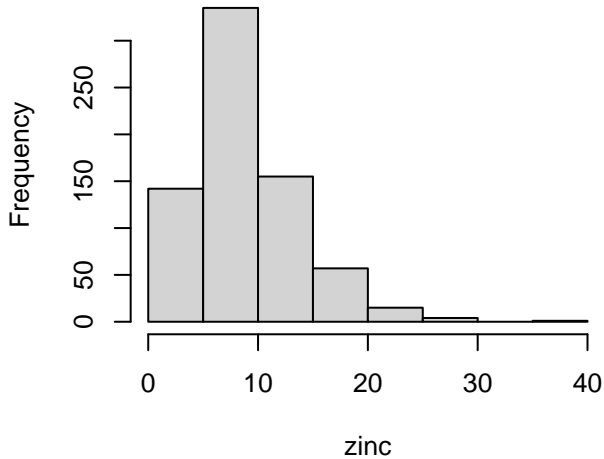

Box-Cox plot for original data for zinc in zambia\_wom  
women ; age 18-67  
 $\lambda = 0.272$  (0.17,0.37)

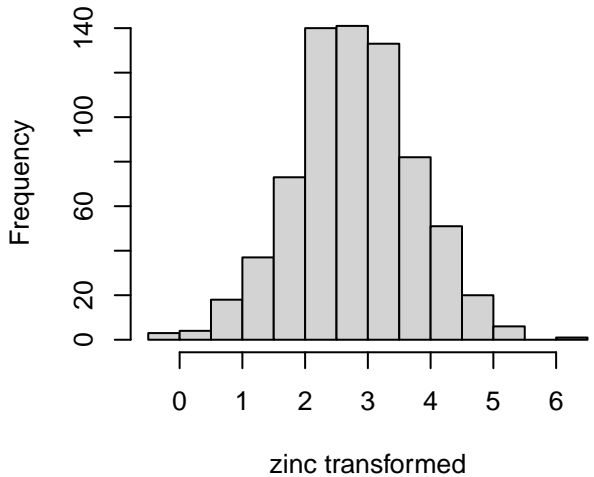

Diagnostic plots for zinc in zambia\_wom  
women ; age 18–67

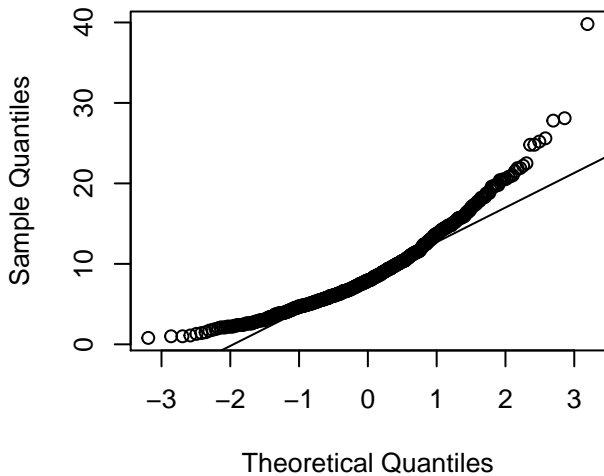

**Intakes before  
Box–Cox trans.**

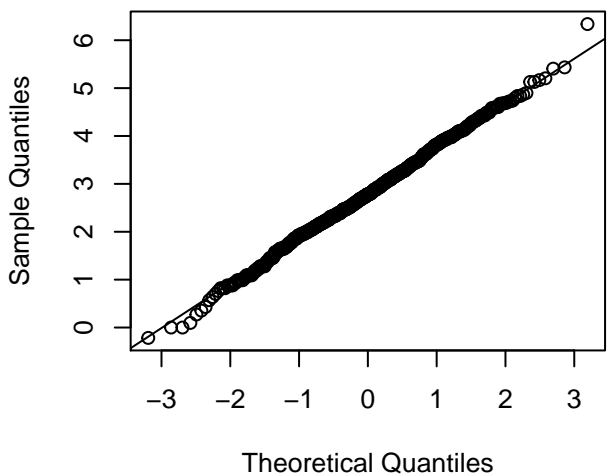

**Intakes after  
Box–Cox trans.**

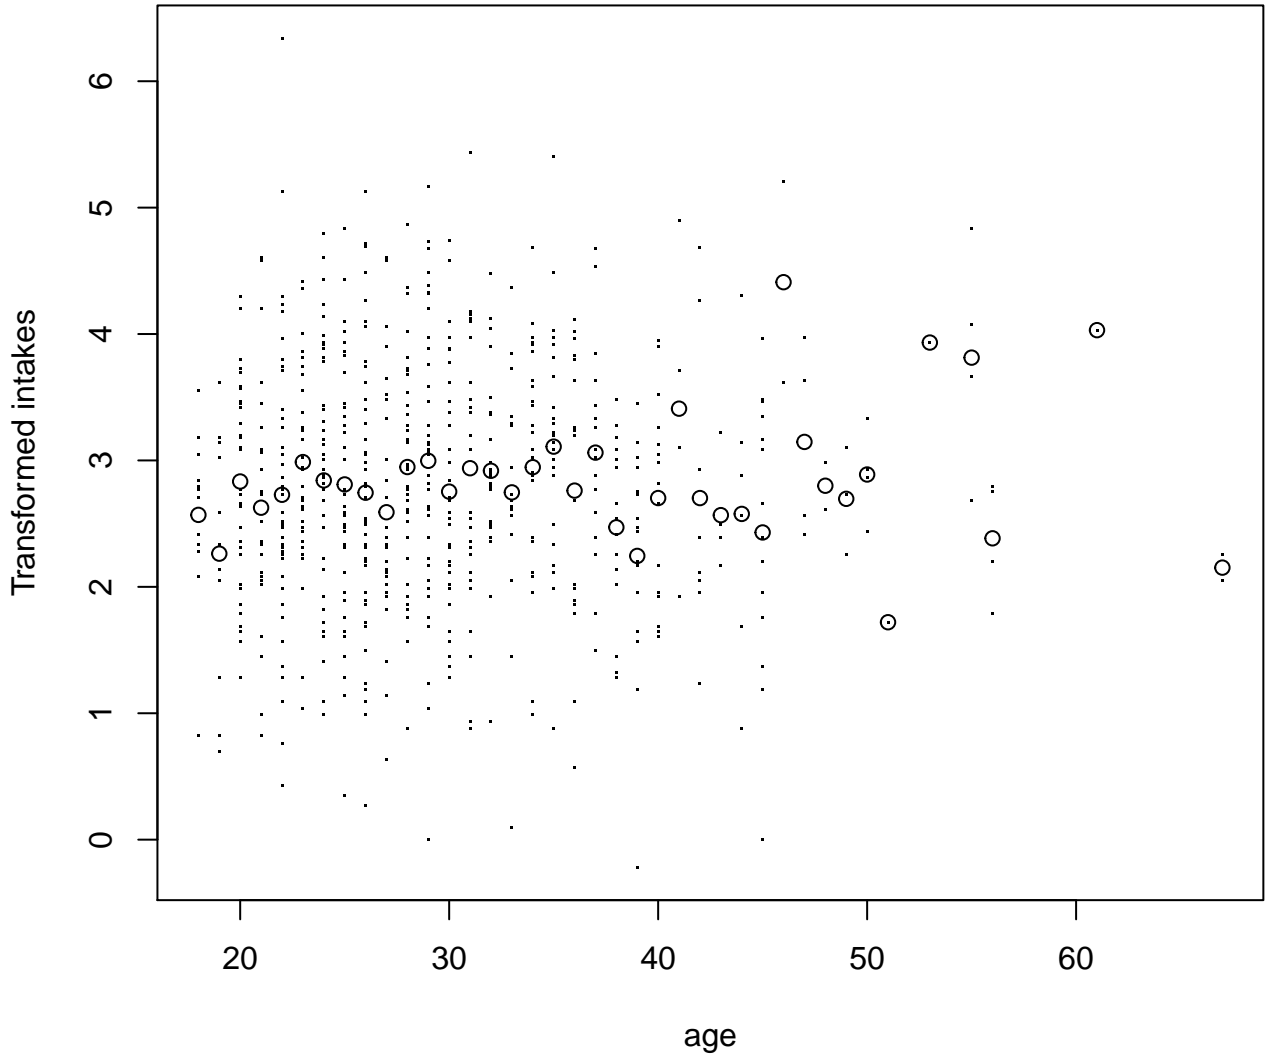

**Normal Q–Q plot  
Original intakes**

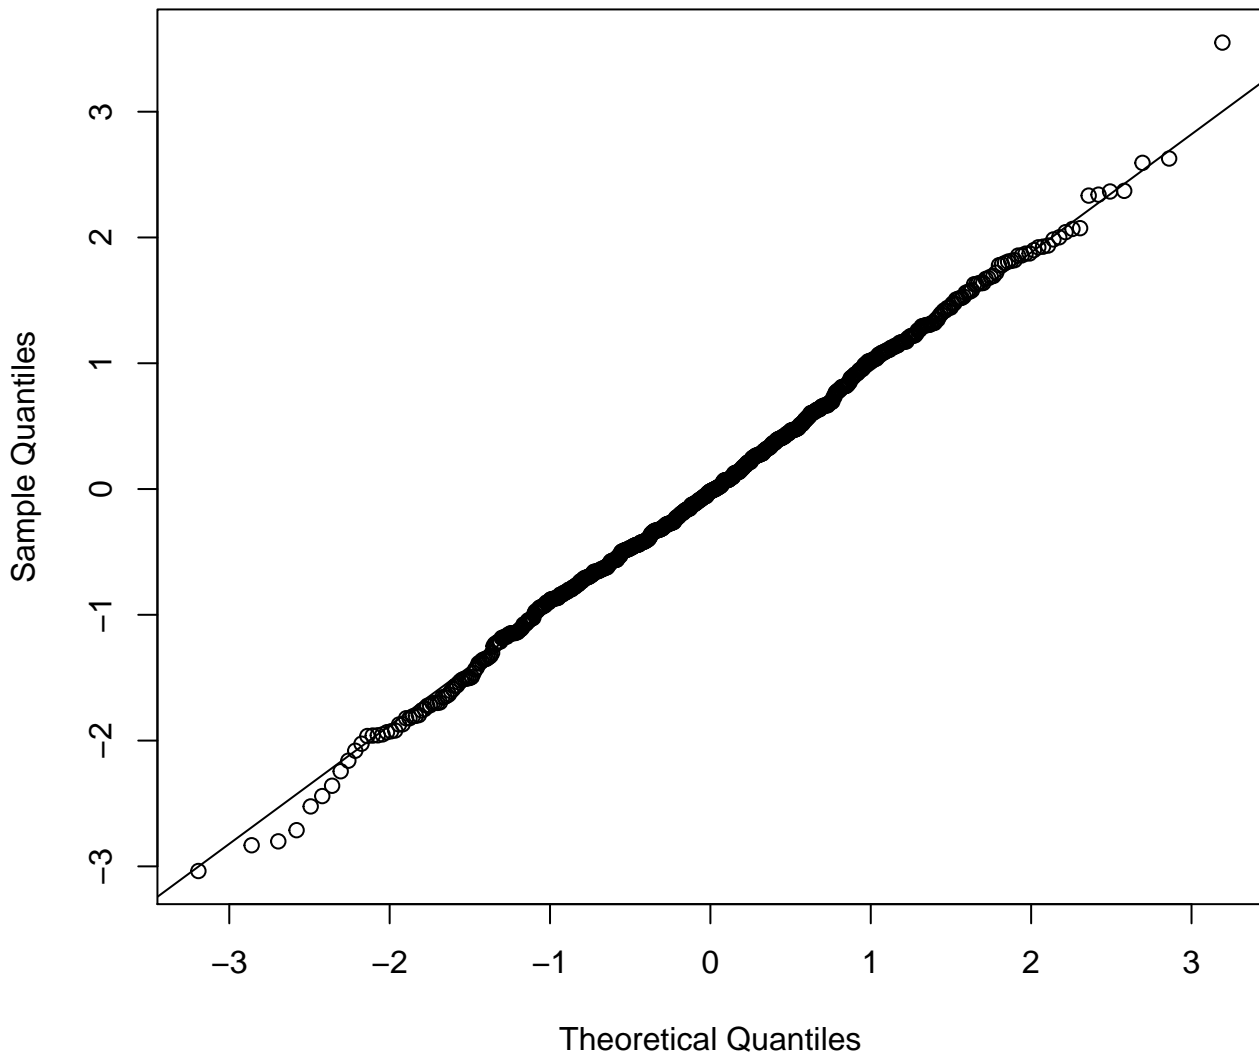

**BoxCox transformed intakes  
lambda = 0.272**

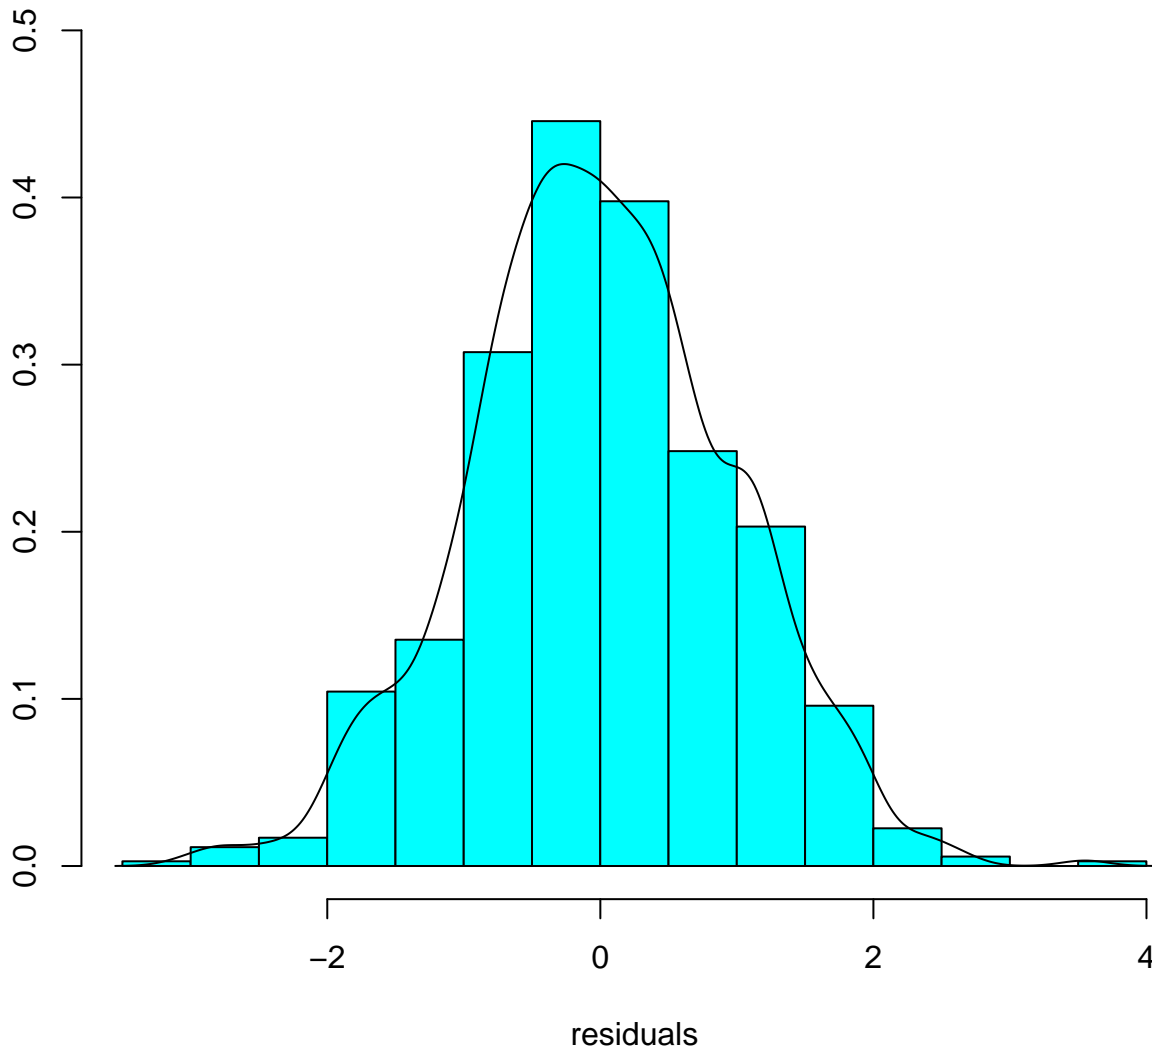

**Transformed data for zinc in zambia\_wom  
women ; age 18-67     $\lambda = 0.272$**

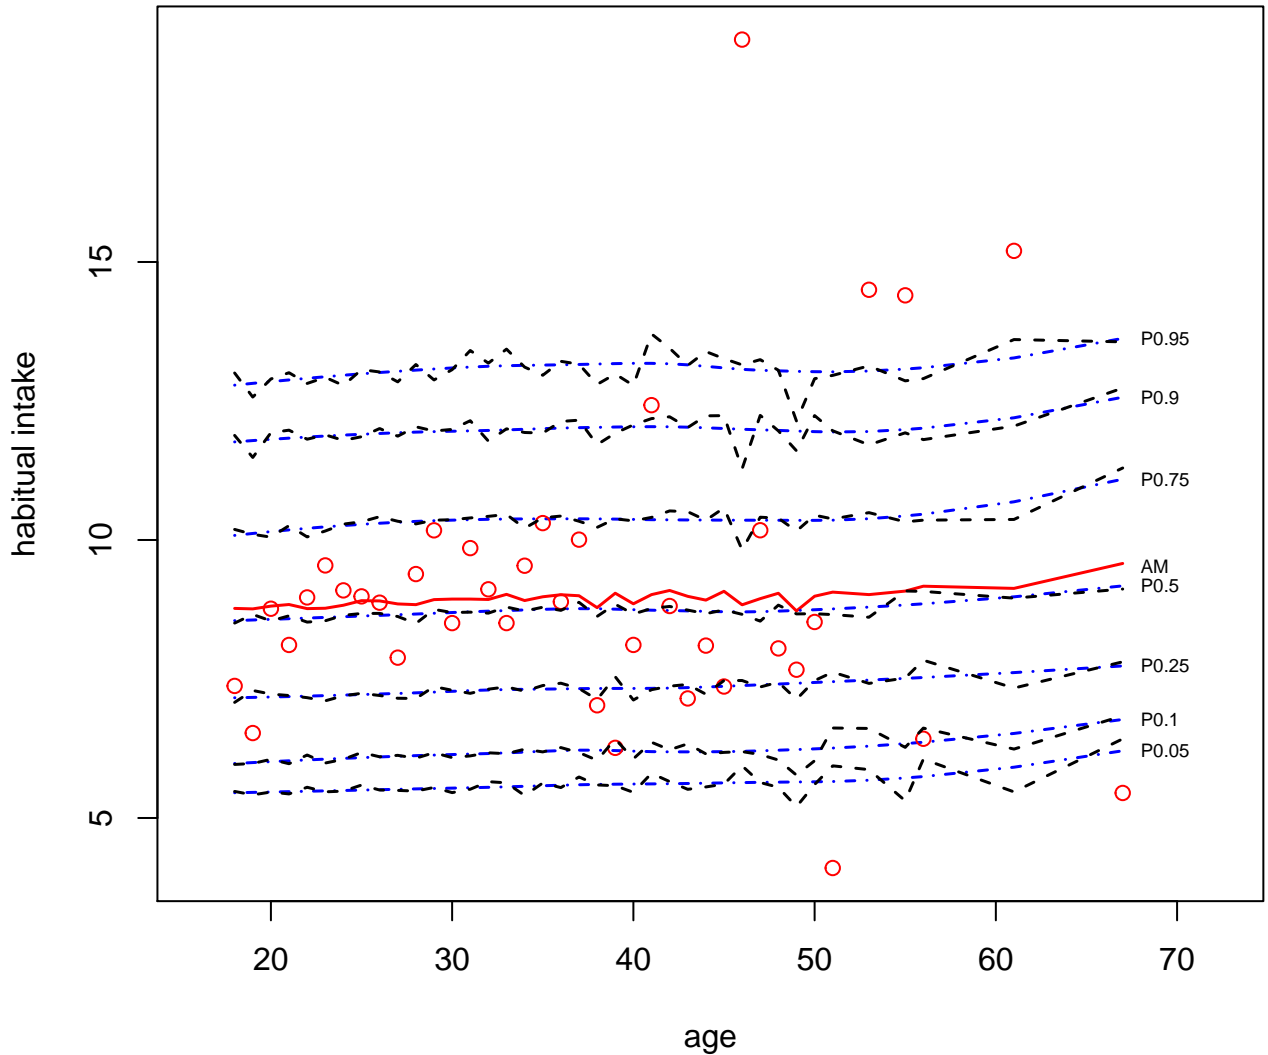

QQ-normal: residuals of model  
intake.trans ~ fp(age)  
women ; age 18-67 for zinc in zambia\_wom

**Histogram: residuals of model**  
**intake.trans ~ fp(age)**  
**women ; age 18–67 for zinc in zambia\_wom**

Habitual amount distribution for zinc in zambia\_wom  
women ; age 18-67  
per person 100 simulated pseudo persons

Habitual intake distribution for zinc in zambia\_wom  
women ; age 18-67  
100 pseudo persons per person are simulated
